

Experience Manager Reference Demos

Hyman Chung

AEM Product Management

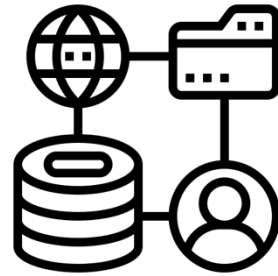

Current challenges in demo'ing AEM as a Cloud Service

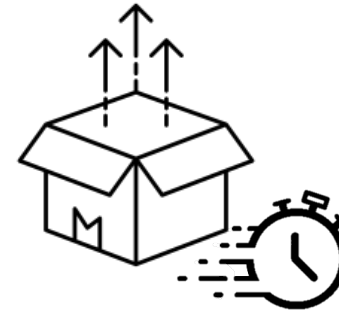

Compelling Demo

Lacking a single demo codebase that showcases all of AEM's rich capabilities

Demo Environment Setup

Installing different available demo codebases into a single cloud service environment is tedious

Monthly Feature Releases

Features are introduced on a faster cadence with little time to prepare and train.

Lack of Reference Materials

Limited materials to direct customers to best practices for implementation.

Reference Demos Zen

Provide a **comprehensive, up-to-date, consolidated, and referenceable** demo code base that is **simple to install** in AEM as a Cloud Service.

Logistics

Scope for Phase 1

- Sites (Headful and Headless)
- Assets
- Asset Share Commons
- Commerce
- Demo Utilities

Provisioning

All Cloud Service Sandboxes

Timeline

Targeting mid-December release
Release 6093+

Support

Coming Soon: New Demo Hub Landing Page for
Reference Demos
